

Storm Assistance for Heating Systems

Offer available 1/1/18-1/31/18. Customer must call by 1/31/18.

Replacing your heating system as a result of flooding from the recent storm and/or cold temperatures? Cape Light Compact may be able to help!

For Residential Customers:

- Expedited processing for 0% Loan applicants - up to 7 year term, up to \$25,000. Need to apply through a participating lender.
- If applying for a 0% Loan, must have had a home energy assessment within last 4 years, or commit to having an assessment.
- Rebates for high efficiency cold climate heat pumps, oil, propane and natural gas* systems are available. Clear photos of unit or other documentation will need to be provided to show proof of storm damage.
- There are options for you even if you are in the process of replacing or have already had to install a new system.
- Income-eligible customers may be eligible for a replacement system at no charge (oil, propane). Electric heated homes must install eligible cold climate heat pump.

*Natural Gas heating customers please refer to GasNetworks.com for rebates.

For Commercial Customers:

- Call Cape Light Compact BEFORE any work commences.
- Comprehensive assessments available to determine what energy efficient products may be installed. Enhanced incentives available for Non-Profits upon applying through Non-Profit program.
- Small businesses that heat with propane may be eligible for a rebate for an eligible replacement heating system.
- Expedited prescriptive rebate processing (non-natural gas rebates only).
- Custom application option.
