Gentlemen;-

I wish to call your attention in regard to the taxation of my cranberry swamp, situated near Obed Doanes residence and near Allens Harbor so-called.

This Spring the water was held back in Allens Harbor for such a time as to retard the growth of vines but not of weeds.

The water remained on the swamp for such a period that in quite a few spots the vines were totally killed, and owing to the water no weeding could be done.

After the water did leave, the swamp

TAX COMMISSIONER

BOSTON

November 1, 1911.

To the Assessors of the Cities and Towns of Massachusetts.

GENTLEMEN: Under the provisions of chapter 490, Part 1, Section 44, Acts of 1909, the lists required to be filed with assessors by section 41 of said chapter, are "required to be preserved by the assessors until the Tax Commissioner orders them to be destroyed."

It now appearing that a large number of such lists has accumulated in various cities and towns of the Commonwealth, I hereby order in accordance with the foregoing provision of statute that all such lists filed prior to the year 1909 be destroyed, except such as are required for use in any suit or proceeding before assessors, county commissioners, or any court of the State.

WILLIAM D. T. TREFRY,
Tax Commissioner.

had to be moved. The swamp is three years old and under ordinary conditions a crop of cranberries was to be effected this fall, as last fall the swamp was in extra good condition as I can quite easily prove.

By looking at the swamp the Board can quite easily see the spots where the vines were killed.

I think under the conditions the Board should take such steps as necessary to lower the taxes on the above swamp.

Awaiting an early reply.

I beg to remain,

Yours truly

Mr. W. Sears Nickerson, Chairman,

Dear Sir:

For your information I am sending you copy of report made to me by first Assistant Engineer Lovis regarding bridge over Herring River in Harwich.

"On July 18th, I met the Selectmen of Harwich and looked over the present bridge over the Herring River in Harwich, which is located on the lower road.

I found that this bridge is not exactly in an unsafe condition, but needs rebuilding. I also found that the town has made an appropriation of $2,500.00 for constructing this bridge and specifies that the bridge shall be of steel (masonry abutments) and I suppose a plank floor. I told them that it would be impossible to construct a first-class bridge of the span desired, viz., 50 feet, for the amount of money available and that we would make designs in the office for a concrete bridge and for a steel bridge with masonry abutments, and would have estimates for the same sent to them.

It appears to me that the town should either appropriate sufficient money to build a new bridge, or spend some $500.00 or $600.00 in the repairing of the present bridge."

Yours very truly,

A. W. Dean

Chief Engineer.
