

## HARWICH ENERGY AND CLIMATE ACTION COMMITTEE

The Committee consist of five members and two (2) alternates appointed by the Board of Selectmen for overlapping three-year terms. The Committee is advisory to the Board of Selectmen. The charge of the Committee is to consider all energy related issues which could affect the town and its residents, including but not limited to:

- Energy conservation
- Assessment of renewable energy use in town buildings and town transport
- Recommendations for potential energy conservation
- Recommendations regarding utility expenses.
- Educational outreach for climate change mitigation and adaptive strategies
- Review of Town By-laws to promote energy conservation and renewable energy use

The Committee is supported by Town Administrator and staff for technical support. The Committee will work with all related town departments and committees and seek the cooperation and assistance of relevant government agencies, non-profit organizations businesses and the public. Any recommended action will be approved by the Board of Selectmen.
