RE: **Notice of Intent – Proposed Seasonal Dock**  
10 Captain Scott Road (Assr's. Map 103, Parcel W1-19)  
Applicant & Owner: Michele C. McMahon, Trustee; Michele C. McMahon 2016 Trust

Dear Commission Members,

On behalf of our client Michele McMahon, J.M. O'REILLY & ASSOCIATES, INC. is submitting the attached Notice of Intent, Site Plan for the installation and maintenance of a seasonal dock within the waters of Long Pond, at the above referenced property.

## **Wetland Resource:**

The property abuts Long Pond (a Great Pond) to the north. The property contains some sandy areas along the shoreline. We have shown the edge of wetland along the beach around elevation 31. The 50- and 100-foot Buffers have been identified on the plan view. Please refer to the Plan for the location of the 50' and 100' Buffer Zones.

## **Narrative:**

The purpose of the Notice of Intent is to seek and obtain the local approval of a seasonal dock structure within Long Pond. The Harwich approval will be followed by an application to the MA DEP Waterways for the license of the proposed structure.

Long Pond is the common boundary between Harwich and Brewster. The Pond is the largest freshwater pond within both the towns. Long Pond is the only pond within the two towns which allows for the larger and faster boats which allows for water skiing and tubing activities. The Pond also is enjoyed by small sailing boats, canoes and kayaks activities. The Pond's bottom within the area of the dock is sandy with little vegetation.

The proposed dock is constructed out of aluminum. The Dock consists of "H" bracket posts which sit on 10" x 10" aluminum pads, which in turn rest on the pond's bottom. No pile or support is proposed to be jetted or drilled into the pond's bottom. A total of 26 alum. pads are proposed to support the dock (15 sf +/-). The entire frame and support posts of the dock will be aluminum. The decking for the dock will be wooden or an approved material. The spacing between the decking is proposed to 3/8".

The dock extends into the waters of Long Pond about 71 feet +/- from the shore. The end of the dock consists of an "L" shape landing which is about 12 feet by 8 feet (96 sf). The area of the proposed dock is about 296 sf +/-

(not including the 12' x 8' landing). The depth of the water at the end of the dock is just over 6 feet. The soundings for the dock were obtained in August 2021. The 6-foot depth represents the average water depth even during times of high water within the pond. An example would be, the water elevation gets closer to the edge of the vegetated wetland, the depth of the dock would be just under 6 feet when measured from the BVW.

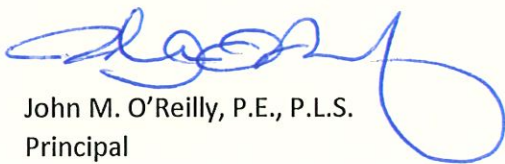

The water depth will provide the sufficient depth for the motor boat to pick up passengers within out causing prop-wash along the bottom of the Pond.

**Variance:**

The existence of the dock within the waters of Long Pond requires that the Applicant seek and obtain a variance from the Town of Harwich Wetland Regulations. The variance is required due to the activity within a wetland resource. The proposed dock is designed to be within compliance with the regulations governing freshwater a dock.

A representative from our office will be present at your December 1, 2021 meeting so as to discuss the project in greater detail and to answer any questions the Commission may have. Please contact my office directly if you have any questions or need any additional information.

Very truly yours,  
J.M. O'REILLY & ASSOCIATES, INC.

**B. Fees**

To calculate filing fees, refer to the category fee list and examples in the instructions for filling out WPA Form 3 (Notice of Intent).

Fee should be calculated using the following process & worksheet. **Please see Instructions before filling out worksheet.**

**Step 1/Type of Activity:** Describe each type of activity that will occur in wetland resource area and buffer zone.

**Step 2/Number of Activities:** Identify the number of each type of activity.

**Step 3/Individual Activity Fee:** Identify each activity fee from the six project categories listed in the instructions.

**Step 4/Subtotal Activity Fee:** Multiply the number of activities (identified in Step 2) times the fee per category (identified in Step 3) to reach a subtotal fee amount. Note: If any of these activities are in a Riverfront Area in addition to another Resource Area or the Buffer Zone, the fee per activity should be multiplied by 1.5 and then added to the subtotal amount.

**Step 5/Total Project Fee:** Determine the total project fee by adding the subtotal amounts from Step 4.

**Step 6/Fee Payments:** To calculate the state share of the fee, divide the total fee in half and subtract \$12.50. To calculate the city/town share of the fee, divide the total fee in half and add \$12.50.
