Weekly COVID-19 Case Update

CASES AND STATISTICS

To date there have been a total of 576 cases of COVID-19 in the Town of Harwich. As of today, we are following 2 active cases of COVID-19 in Harwich residents (Yay!!) Our positivity rate has decreased dramatically to 0.97% which is determined by the number of tests administered. There were 945 tests administered and 33 tests were positive in the last 19 weeks. Our numbers are extremely encouraging.

VACCINE UPDATE

Governor Baker announced that, **beginning Thursday March 11th, K-12 and early childhood educators, child care workers, and K-12 school staff will become eligible to schedule** COVID-19 vaccine appointments. This group of workers will join the currently eligible groups (including 65+ and individuals with 2+ certain medical conditions). These K-12 and early childhood educators and staff may book appointments at all 170 sites currently open to eligible residents in Massachusetts by visiting www.mass.gov/covidvaccinemap.

There are approximately 300,000 K-12 educators, child care workers and school staff in Massachusetts. Due to a severely constrained federal supply and the existing population that is currently eligible for vaccines, it is estimated that it will take a month for all eligible individuals to secure a first appointment. This timeframe is only subject to change if federal supply increases dramatically, including the *recently authorized Johnson & Johnson vaccine*.

TESTING

For testing options at Outer Cape Health, please call 508-905-2888 in advance to make a testing appointment.

Testing is available in other locations 7 days per week through Cape Cod Healthcare. Call the Community Testing Line at 508-534-7103 to make an appointment.

ARTICLE 19: To see if the Town will vote to raise and appropriate, transfer from available funds, or borrow a sufficient sum of money to fund the purchase of combination pumper/ladder fire truck known as a Quint, and all costs incidental and related thereto. The appropriation authorized by this vote shall not take effect until the Town votes to exempt from the limitation on total taxes imposed by M.G.L. c.59 § 21c (Proposition 2 ½) the amounts required to pay the principal of and the interest on any borrowing authorized under this article. And further, in accordance with Chapter 44, Section 20 of the General Laws, the premium received by the Town upon the sale of any bonds or notes thereunder, less any such premium applied to the payment of the costs of issuance of such bonds or notes, may be applied to pay project costs and the amount authorized to be borrowed for each such project shall be reduced by the amount of any such premium so applied, and to act fully thereon. By request of the Board of Selectmen and Capital Outlay Committee. Estimated cost: \$1,138,000.00.

Explanation: The fire department, in an effort to relieve some financial pressure on the capital budget in FY 2020 and 2021, offered the following modification of the Capital plan:

By the time the FY21 budget was being prepared, the estimated cost of the quint had risen to 1.1 million. The manufacturer has indicated that another price increase will happen this month, and the new estimate is \$1,138,500.00. We are working with the representative and reviewing the specifications in the hopes of reducing that number. The passage of a debt exclusion ballot question at the Annual Town Election on Tuesday, May 18, 2021 is also necessary for purchase of this item.

Vehicles to be disposed of if determined to be surplus
1991 Elgin Premier
1996 L-70C Front End Loader
2005 Ford F-150
2006 Ford E-250 Van

Explanation: The 1999 Sterling Dump Truck is becoming extremely difficult to find parts for due to its age and the parts we do get are extremely expensive. The front end loader has over 30,000 hours of use or the equivalent of 1,200,000 miles on it. It has been a solid piece of equipment and served the Town well, but it is time to replace it. This is a front line piece of equipment that is used 362 days per year at the Disposal Area and helps generate the \$3.3M in revenue. The average yearly maintenance cost has been \$21,748, indicating that it is time to remove this loader from front line work. The 2005 F-150 is at the end of its useful life and has 191,102 miles on it. The frame on this 16 year old vehicle is rotted through and may not pass State safety inspections any longer. The 2006 Ford E-250 Building Maintenance van floors and body panels are rusted through. It is questionable whether it will pass a safety inspection this year.

Amend General Bylaw Ch. 304 – Water Dependent Structures

Article 36: To see if the Town will vote to amend the Code of the Town of Harwich under the General Bylaw Chapter 304 Water Dependent Structures as follows (new text shown in **bold underline** and deleted language shown in strike-out):

Within §304-1. Purpose - add the phrase “**elevated walkway**” after “dock” in the first sentence.

Within §304-2 Definitions – add one new definition as follows:

CUMULATIVE IMPACT - The effect of a subject activity which, when considered in isolation, may or may not have a significant impact on environmental interests but when considered in relation to other past, present or anticipated future activities in a given area can be expected to be significant in the aggregate.

And further, amend the definitions of Mean High Water, Piling, and Water Dependent Structure as follows:

MEAN HIGH WATER - The elevation in feet above North American Vertical Datum of 1988 (NAVD 88) ~~National Geodetic Vertical Datum (NGVD)~~ established by the present arithmetic mean of the water heights observed at high tide over a specific nineteen-year Metonic cycle (the National Tidal Datum Epoch) as shown on the New England Coastline Tidal Flood Survey - Tidal Flood Profile No. 9 Barnstable to Chatham, MA by the New England Division, Corps of Engineers. Where salt marsh occurs, the mean high tide will be that point where *Spartina alterniflora* gives way to *Spartina patens*. Walkways over salt marshes that extend beyond this intersection will be regulated under the provisions of this bylaw.

PILING - A column constructed from any material used to support the deck or other structural member of a wharf, pier, elevated walkway, or dock or to serve as a mooring spar or dolphin for vessels or floats.

WATER-DEPENDENT STRUCTURE - Any structure or combination of structures built adjacent to or at an angle from the shore and extending seaward beyond the mean high-water mark so that people may access the water ~~vessels may lie alongside to receive and discharge passengers or cargo or for use as a promenade~~ and shall include structures commonly referred to as floats, docks, piers, elevated walkways, or wharves.

Within §304-4 Restricted Areas –amend as follows (new language is shown in bold underline and deleted text is shown in ~~strike out~~):

No permit shall be issued for construction of a new, private, water-dependent structure in the following areas: ~~of~~

Round Cove ~~of~~ in Pleasant Bay. This area includes all contiguous parcels beginning with the northerly boundary of the property (Map and Parcel Number 115-S1-3) and extending southerly along the shore to the southerly boundary of the property (Map and Parcel Number 109-B1-5), and all shore front parcels between these two properties, including Round Cove. This prohibition does not apply to existing, licensed structures or to the maintenance of existing, licensed structures.

Both sides of the Herring River. This area includes all contiguous parcels beginning at the northerly boundary of Map 28 Parcel D1 on North Road near the pedestrian bridge over the river, and extending southerly down the river to the southern boundary of 1 Belmont Road, Map 1 Parcel C1, at the mouth of the river where it opens up to Nantucket Sound.

Within § 304-5 Application for a permit in section B1, change fourteen copies to twelve, and add the phrase “and narratives” after “plans” in the first sentence.

Within § 304-8 Standards to be met, amend sections D, F, H, and J, and add a section K as follows (new language is shown in bold underline and deleted text is shown in ~~strike out~~).

D. No structure (except floats) shall exceed four feet ~~of walkway~~ in width.

F. In order to protect the foreshore, all structures (except floats) shall be supported by pilings. Decks shall have a minimum ~~1/2~~ 3/4 inch spacing between deck planks, or may use grating instead with permission from the Commission, and shall be at an elevation ~~height~~ height equal to 1.5 times the width of the deck above ~~mean high water or, in areas of marsh, above the marsh vegetation~~ the

salt marsh to the decking, whichever is higher. In areas where the structure is over a wetland resource area other than salt marsh, the height may be equal to 1.25 times the width of the deck. Notwithstanding the foregoing, in all areas where the foreshore is passable on foot, a flight of stairs on either side of the deck shall be provided to allow persons to lawfully use the foreshore, or be of a height that persons may pass underneath with. A directional sign in compliance with the Zoning Bylaw, Chapter 325, Article VII, shall be placed indicating permission to cross the structure.

H. No structure shall be located within 50 feet of an existing eelgrass bed or within a shellfish area defined by the Town bylaws or Town Shellfish Warden, unless expressly allowed by a variance from the Conservation Commission upon clear and convincing evidence provided by the applicant that the proposed project will not have an adverse impact to the wetland resource area(s) or its interest(s). An indication of the presence or absence of shellfish at a proposed site ~~must~~ may be determined by a shellfish survey submitted by the applicant. This shellfish survey shall conform to the sampling methods set forth in the Harwich Wetland Protection Regulations. The survey shall include existing populations of all sizes of commercially important species of shellfish (clams, oysters, quahogs, scallops, and mussels) and shall also include other species of mollusks which may indicate the capacity of the area to support commercially important species. The survey shall also include a description of shell fragments, if feasible, and references, if available, to historical information regarding the presence or absence of shellfish species. Within the Pleasant Bay ACEC, relocation of shellfish encountered during construction of a project is not acceptable mitigation (except when the project is part of a Town- or state-sponsored shellfish relay program, and then only if it can be clearly shown that the productivity of that shellfish bed would not be diminished by its relocation).

~~J. In order to provide the underlying seabed full exposure to sunlight during six months of the year, all proposed structures shall be seasonal, with seven months' maximum use. Off-season storage plans shall be submitted for review and approval by the Conservation Commission.~~

J. Recreational water dependent structures are allowed to be used for six months out of the year (May-October). Floats are to be removed from the water by November 1 annually. Off-season storage of the floats shall be off site or outside of the 50' wetland buffer and not on any native plant species. Storage of the float on the marsh is strictly prohibited, and shall result in enforcement action from the commission.

K. There shall be a depth of at least three feet at mean low water on all sides of the float. No vessel shall be aground at mean low water.

Within §304-9 Denial of a Permit – amend as follows (new language is shown in **bold underline** and deleted text is shown in ~~strike-out~~):

The Commission may deny a permit in any case where a proposed **water dependent** structure or combination of structures, does not meet the criteria set forth in this Bylaw.—otherwise complying herewith, would not extend to a point where at mean low water a water depth of at least ~~2 1/2~~ feet is maintained ~~no vessel shall be aground at mean low water.~~

And to act fully thereon. By request of the Conservation Commission

Amend General Bylaw Ch. 310 – Wetlands Protection Bylaw

Article 37: To see if the Town will vote to amend the Code of the Town of Harwich under the General Bylaw Chapter 310 Wetlands Protection as follows:

Within §310-2. Definitions, Paragraph A, delete the last sentence under the definition of Agriculture and the definition of Aquaculture,

and further, add seven new definitions, in alphabetical order as follows:

BUFFER ZONE - The jurisdictional area extending from the landward limit of a wetland resource area 100 feet landward. Land Subject to Coastal Storm Flowage and Riverfront Area do not have any buffer zones under this bylaw.

CUMULATIVE IMPACT - The effect of a subject activity which, when considered in isolation, may or may not have a significant impact on environmental interests but when considered in relation to other past, present or anticipated future activities in a given area can be expected to be significant in the aggregate.

MITIGATION - The means to offset any potential negative impacts a project may have on a wetland resource area(s) or buffer zone(s) thereto, and a means to improve the wetland resource area(s) and their interests on the site. There are various forms of mitigation the commission may consider, including but not limited to on-site mitigation, off-site mitigation, and in-lieu fees on mitigation-constrained sites to improve specific other wetland resource areas in town.

MITIGATION-CONSTRAINED SITES - A project site that does not lend itself to the need for any on-site mitigation, but due to the proposed activity on the site, requires mitigation as per the Harwich Wetlands Protection Regulations.

SIXTY FOOT NO NEW STRUCTURE ZONE - The 60 foot no new structure zone is the upland area that extends from the landward edge of the wetland sixty feet inland as determined by a professional land survey and wetland delineation. When siting a new building or an addition within the 50-100-foot buffer zone, the structure shall be set back at least 60 feet from

the resource area to allow for human and wildlife passage between the building and the 50-foot buffer, to reduce alteration to the 50-foot buffer, and to avoid the intrusion of lawn in the 50-foot buffer. Within the 50-60' buffer area, no new structure is permitted that would impede access so as to cause intrusion into the 50' No Disturb Zone.

SHELLFISH - Mollusks including but not limited to the following: clams, conchs, mussels, oysters, periwinkles, quahogs, razor clams, scallops, and sea clams; and crustaceans such as lobster or crab.

VARIANCE - An official dispensation from a rule or regulation. - (1) Maintenance **or reconstruction** of an existing permitted structure **within the same footprint**.
- (2) An activity that has been expressly allowed by a variance from the Conservation Commission.

And further, delete paragraph D in its entirety and replace it with the following:

D. Conservation variance provision. In rare and unusual circumstances the Commission, at its discretion, may grant a conservation variance from the requirements of this bylaw. Such a conservation variance shall be granted only in the following cases:

- (1) Where maximum feasible compliance is achieved; and
- (2) Where there are clear and compelling reasons of public safety and welfare; or

And further, in paragraph D, add the phrase “this Bylaw and associated Wetland Protection Regulations” after “may grant a conservation variance from the requirements of” and omit the phrase “the fifty-foot no-disturb zone.”

Within §310-8 Permits and conditions, paragraph C, insert the word “provide” after the word “shall in the second sentence.

and further, add the following new paragraphs:

J. The Commission is authorized to require an applicant to pay a fee for the reasonable costs and expenses borne by the Commission for specific expert engineering and other consultant services deemed necessary by the Commission to come to a final decision on the application. This fee is called the consultant fee. The specific consultant services may include but are not limited to the resource area survey and delineation, analysis of resource area values, including wildlife habitat evaluations, hydrogeologic and drainage analysis and environmental or land use law.

K. The Commission may require the payment of the consultant fee at any point in its deliberations prior to a final decision. The applicant shall pay the fee to the Town to be put into a consultant services account of the Commission which may be drawn upon by the Commission for specific consultant services approved by the Commission at one of its public meetings.

L. The exercise of discretion by the Commission in making its determination to require the payment of a fee shall be based upon its reasonable finding that additional information acquirable only through outside consultants would be necessary for the making of an objective decision.

M. The Commission shall return any unused portion of the consultant fee to the applicant unless the Commission decides at a public meeting that other action is necessary. Any applicant aggrieved by the imposition of, or size of, the consultant fee, or any act related thereto, may appeal according to the provisions of the Massachusetts General Laws. And to act fully thereon. By request of the Conservation Commission

Amend the Town Seal

Article 39: To see if the Town will vote to request the Harwich Historical Society lead a project to potentially update the Town of Harwich Seal to depict a more accurate representation of the Wampanoag dwelling with the replacement of the tepee with a wetu (wigwam). Updates, including financial implications, will be provided to the Board of Selectmen to take appropriate action and to act fully thereon. By request of the Board of Selectmen.

Explanation: The Harwich town seal was designed in 1896 by renowned artist Charles D. Cahoon. The bottom half of the seal shows Pine Grove Seminary, today's Brooks Academy Museum, surrounded by trees. The top half depicts a Native American standing next to a Great Plains style teepee.

According to the Wampanoag Tribe the depiction is not accurate. The tribes in this area lived in wetus, sometimes referred to as wigwams. Wetu in the Algonquin language means “round house” and describes a dome-shaped structure. The wetu was more of a long-term dwelling used for six or seven years. In the summer it would be covered with a cattail mat, and in winter it would be re-

covered with bark. A tepee is conical in shape. Native Americans tribes west of the Mississippi River, who had more nomadic lifestyles, lived in teepees because they were easier to pack up and take with them.

With current attention focused on historical accuracy related to our Native American culture, now would be an appropriate time to research the wigwam, to do the seal justice and update it and make it more reflective of history.

This article is to establish a mechanism for further discussion with input from residents, town officials (including the Town Clerk as the seal is under her jurisdiction), tribal officials and the Historical Commission to consider the possible updating of the town seal.
