CONSERVATION COMMISSION

(508)-430-7538 FAX (508)430-7531

December 5, 2019

To: The Community Preservation Committee
From: The Harwich Conservation Commission

RE: Priorities for use of the requested \$20,000 of CPA funds for rehabilitation of Open Space

At their meeting on December 4, 2019, the Harwich Conservation Commission came up with the following list of priorities that would benefit from the requested \$20,000 in CPA funding requested out of the Open Space fund. These funds would help preserve and rehabilitate our conservation lands by better-defining access, keeping illegal activities out, and protecting sensitive ecosystems while still allowing for public passive recreation.

1. Two heavy-duty gates. One within the Robbin's Pond Conservation Area in a secluded area where some illegal activities have been taking place and where off-road activities have caused habitat fragmentation. Once the gate has been installed, the area can be cleaned up, and the area left to naturalize. Second gate at entrance to the Bells Neck Conservation Lands off Depot Street. We have reached out to our counterparts in Mashpee who have ordered gates recently to see where they purchased them from and cost. In the meantime, please see attached quote and example of what we are looking for. Each complete gate setup is \$1,879. Two gates = \$3,758
2. Split rail fencing to better designate allowed access/prohibited access areas at several conservation areas. The Commission requested I get a quote for various lengths of fence. See attached. We request enough for 800 linear feet; this amount will last us a long time and be used at a variety of conservation areas to keep people out of sensitive habitats and better define access points. The quote came out at \$3280.
3. Steel Bollards. \$205 each. Would request a minimum of 15 of them. \$3,075
4. Native Plants. 3 gallon size. Approx. \$35-40 each. Request a minimum of 75 Plants. \$3000
5. Aluminum signs stating rules and regulations in our conservation lands. 10-15 signs. See quote from New-England Reprographics attached. \$371.22 for 15 signs.
6. Farm gates (6) = \$1100 See Tractor Supply quote.

7. 2 trail cameras with all necessary accessories and data plan (wireless cameras) = \$800
8. Other signage. 15 'No Motorized Vehicle' signs = \$420. 15 Sensitive habitat area signs \$300

When you add everything above up, it come out to just over \$16,000. With factoring in contingencies, delivery costs, potential labor costs if we cannot do all the work in-house, and not knowing every small detail, the Conservation Commission has requested \$20,000 to cover all costs related to preserving and enhancing the town's open space areas.

Detailed Description

Pour in Place Steel Bollard

Make your bollards permanent by setting them in concrete. The extra length of these Pour in Place Bollards allows you to maintain the needed height fixing the bollard in concrete. Bollard comes with welded anchoring tabs and a removable cap so the bollard can be filled with the concrete to increase strength and durability.

- Powder coated yellow for high visibility.
- 48" useable Height, 58" overall Height, 5 1/2" outside diameter.
