Subject: Case #PB2023-22 Eastward Companies

Hello, we are attempting to contacting the planning department in regards to the proposed subdivision adjacent to Huckleberry Path and daughter Ashley Tarr's residence.

We attended the meeting this week and unbeknownst to us the case was tabled in advance.

Ashley's residence is on the North side of the road, one parcel West of the proposed West boundary 8 unit subdivision.

We wanted to bring attention to the Board that we periodically hear Owl's hooting at night from the adjacent woods although not sure believe these could very well be Short-eared Owl, an endangered species. Destruction of native species habitat is the leading cause of extinction.

We therefore kindly request the Planning Board take the required actions within its scope of authorities to determine if indeed this is the owl's habitat and, if so, mitigate the plans to help preserve the owl.

Appreciate you pass this along to the Board Member and kindly confirm you are in receipt of this email

Regards on behalf of Ashley Tarr

Chris & Sandra Tarr
