## **Wilma's Way Pumping Station Zoning Narrative**

The Town of Harwich is seeking relief from the Zoning Bylaws for each of the following pumping station:

- Wilma's Way Pumping Station - 3 Wilma's Way

The Harwich Phase 3 Sewer Project will allow the Town to continue implementing their approved Comprehensive Wastewater Management Plan (CWMP). This project will continue the sewer implementation called for in the CWMP to address nitrogen loading from septic systems by implementing a wastewater collection system to sewer watersheds that impact coastal estuaries. This collection system extension is part of the Town's approach of achieving nitrogen Total Maximum Daily Load (TMDL) compliance. This project will address a portion of the Pleasant Bay Watershed including Muddy Creek Upper and Lower, Round Cove, and Pleasant Bay sub watersheds in compliance with the Town's existing Watershed Permit for Pleasant Bay. Construction for Phase 3 will include approximately 9 miles of sewer and 5 pumping stations.

The purpose of this application is to obtain variances – relief requested- from setback requirements set forth in the Harwich Zoning Bylaw, Sections 325-21, 325-52, and 325-18G.

This site will include the construction of a new municipal pumping station including backup generator, electrical enclosure, access drive, buried wet well and buried valve vault and associated piping and appurtenances.

GHD is requesting relief on behalf of the Town of Harwich for setbacks, lot frontage, and lot area in the amounts shown on the attached plans.
